
Mask Templates

Before cutting out your templates, measure the size and space between the eyes of the mask wearer and modify or draw on holes to correspond. Then trace the template onto paper or felt, cut out and decorate as desired.

Tip: Glue your mask to a wooden dowel, chopstick or straw, and hold it in front of you masquerade style. Or wear it: Punch holes in both sides, then tie on a loop of elastic. Measure your head first to ensure it fits.
