

NOTEBOOK POCKET TEMPLATE

Print this page to create your notebook pocket. Try printing on a heavier weight paper or cardstock for a sturdier pocket.

Cut out along the solid lines. Fold the long dotted lines away from you, and the short dotted lines toward you. Use a small amount of white glue to attach the three tabs of the pocket to the back, inside cover of your notebook or journal. The opening of the pocket should face inward to keep papers from falling out.
